Dear Hiring Manager:

Infosys Hiring Manager
HR Manager
One America Tower One
American Square Floor, 22
Indianapolis, IN 46282

Thank you for reviewing my resume in consideration of your Tech Process Associate position. The position of Tech Process Associate is a role that interests me because of the emphasis placed on training and education at Infosys.

Most recently I studied with the Eleven Fifty Academy boot camp where the curriculum focused on coding using C#, HTML, and CSS programming languages. In my final project, I designed, from a spreadsheet, an application to track truck drivers' miles and weekly pay. Once that system proves itself I hope to get it into production as an app available to the general public.

I am excited to talk with you about how I can apply my education and training with Infosys. Thank you for your time.

Best Regards,

Marjorie Sandoval
